DROP-INS WELCOME!

JOIN BIRD-FRIENDLY BUILDING EXPERTS FOR A BIRD-CRAFTING WORKSHOP

Weds, April 22 | 3-5 p.m.

Stanley Park Dining Pavillion-
Heron Room
610 Pipeline Road, VAN

This **free, hands-on Bird-Friendly Crafting Workshop** brings together leading bird-friendly building experts and community members for a rare opportunity to connect, learn, and create. Participants will craft life-size replicas of migratory bird species affected by building collisions, while gaining practical insight into the causes and solutions for these preventable deaths. The fabric sculptures will form part of a travelling art exhibit of 10,000+ birds by Bird Collisions in the Anthropocene.

BIRD-FRIENDLY EXPERTS

Michael Mesure is the Executive Director of FLAP-Canada and a leading global expert on bird-friendly building and window collisions.

Krista De Groot is a terrestrial bird biologist with Environment and Climate Change Canada and a leading researcher on bird-window collisions in Canada.

Kathleen Johnson, Window Collision Monitor & Advocate, Calgary Urban Species Response Team & Bird Friendly Calgary.

Meredith Barges is a bird-friendly building policy researcher and advocate, and a PhD candidate in Env Policy at SUNY ESF.

RSVP to Kathleen Johnson at calgaryresponse@gmail.com or 403-701-9557
